ENVIRONMENTAL POLICY

Date: 12/10/2017

Tirana International Airport (TIA) recognizes the importance of maintaining and enhancing the quality of the environment in Albania. TIA is fully committed to controlling and minimizing the potential impact on the environment and the local communities due to operation and development of Tirana International Airport, as well as to assuring the environmental standards in all areas of its concern.

The guideline of our actions are the integration of sustainability principles into our business processes and decision making by adopting measures to conserve natural resources and energy, to protect ecosystems in order to maximize the social, economic and environmental benefits from continued growth of airport.

We will plan, review and update our environmental objectives and targets in order not only to comply with the legislation but also to pursue a proactive approach for the future.

TIA will promote awareness and will encourage the use of environmentally responsible practices among TIA employees. With our experience in environmental management we will encourage and support our business partners, community to participate in an airport wide cooperation.

TIA has set up and is implementing and maintaining an Environmental Management System (EMS) oriented toward ISO 14001 and ensures continuous improvement.

Based on an environmental management tool, our performance and achievements will be published yearly in an Environmental and Social Bulletin.
